BUREAU OF THE CENSUS

William L. Austin, Director

--o--

This is one of a series of reports presenting the findings of the 1933 Census of American Business. The statistics are based on information collected during 1934 in a field canvass with funds provided by the Federal Civil Works Administration.

The reports are prepared under the supervision of Fred A. Gosnell, Chief Statistician, by William A. Ruff, in charge of Service Establishments, Places of Amusement and Hotels, assisted by Ralph C. Janoschka.

SERVICE ESTABLISHMENTS, PLACES OF AMUSEMENT  
AND HOTELS: 1933

PLAN OF PRESENTATION

- Volume I.--United States Summary, by Kinds of Business and by States.--Contains explanation of terms and classifications, and summary tables showing for the United States as a whole by kinds of business the data developed by the census; also tables presenting State totals.
- Volume II.--Statistics by States.--Contains explanation of terms and classifications, and tables for each State showing by kinds of business the number of establishments, receipts, proprietors, full-time and part-time employment, payroll, expenses, employment (by months), and sex of employees.
- Volume III.--Statistics for Counties and Cities.--Presents data for counties and cities, by States, for number of establishments, receipts, proprietors, full-time employees, total payroll, and part-time payroll. For each county and city of 2,500 or more inhabitants, totals are shown for three separate groups: Service establishments, places of amusement and hotels. The same data are shown for detailed kind of business classifications for cities of 50,000 inhabitants or over.
- Volume IV.--Hotels: 1933 and 1929.--Compares 1933 and 1929 Census data for hotels with 25 guest rooms and more.

SERVICE ESTABLISHMENTS, PLACES OF AMUSEMENT  
AND HOTELS: 1933

--O--

GENERAL EXPLANATIONS

Scope of the report.---In this report are presented statistics for service establishments, places of amusement, and hotels for the year 1933. Data are shown for counties and cities, by States, for number of establishments, receipts, proprietors, full-time employees, total payroll and part-time payroll. For each county, and city of 2,500 inhabitants or more, totals are shown for three separate groups: Service establishments, places of amusement, and hotels. The same data are shown for detailed kind of business classifications for cities of 50,000 inhabitants or more. Summary tables are also presented for the United States by detailed kind of business classifications and by State totals for the three groups combined.

The classification "service establishments" as used in this report includes places of business performing personal service for the public such as barber shops, beauty parlors, shoe shine parlors, hand laundries and similar establishments; business services such as credit and collection agencies, cartage and trucking establishments, etc.; mechanical repair services such as automobile top and body repair shops, electrical repair shops, watch, clock and jewelry repair shops, blacksmith shops and other classes of shops making mechanical repairs; and miscellaneous services such as window cleaning, storage garages, parking lots, etc. Places of amusement serving the public for revenue such as theatres, amusement parks, shooting galleries, dance halls, etc., are included in this survey. The census also includes both year-round and seasonal hotels. Aside from the kind of business classifications shown in the accompanying tables, more than two hundred other kinds of business were canvassed, the data for which are included in the "other service" or "other amusement" groups. The classifications shown separately represent the more important kind of business groups as measured by volume of receipts and number of establishments.

In many cases, establishments are engaged both in retail trade and service or amusement activities. As a rule such establishments were included in the retail census if more than 50 per cent of the total receipts was derived from the sale of merchandise; and as service establishments or places of amusement if more than 50 per cent of the total receipts was for services or amusements. There are a number of exceptions to this rule which are explained in the definitions of the individual classifications. The most important of these is the group of automobile repair shops, frequently regarded as service establishments. A considerable share of the revenues of such shops accrues from the sale of automobile parts and supplies. They are included in the retail census to maintain comparisons with the 1929 census of distribution.

A number of kinds of business which might reasonably be regarded as service establishments or places of amusement were not included in the canvass. Some were excluded because they are being covered by other adequate statistical series and others were not canvassed on account of the limited funds available to take the census. The more important kinds of business excluded were public utilities, power laundries and cleaning and dyeing plants, transportation companies, financial institutions, real estate companies, insurance companies, construction companies, educational institutions, hospitals and sanitariums, professional and scientific services.

In drawing definite conclusions from the details of the accompanying tables, it should be borne in mind that the irregularities and deficiencies in coverage are more pronounced in certain classifications and in some areas than in others. The coverage was particularly incomplete for establishments of a seasonal character which were frequently not in operation at the time of the enumerator's visit.

Area and period covered.---The canvass covering the 48 States and the District of Columbia was conducted in the first four months of 1934. The activities of establishments for the calendar year 1933 were reported. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation.

EXPLANATION OF TERMS

Establishments.---Only those service and amusement enterprises having a recognized place of business are considered establishments; and such establishments, to be so classified, must be engaged primarily in providing service or amusement. Each unit of a chain is considered a separate establishment. Service and amusement concessions, operated independently in connection with other businesses, are classified as separate establishments. An individual's residence was considered a place of business if a sign indicated that the occupant was engaged in a service business.

Receipts.---Receipts represent total revenue of the establishment less refunds for returned merchandise. Receipts were reported in answer to the following inquiries:

- (a) Receipts from sale of merchandise (deduct returned sales).
- (b) Receipts from service sales, parking, storage, repairs, cartage, cleaning, etc.
- (c) Receipts from room rentals (hotels, auto camps, etc.).
- (d) Receipts from sale of meals (and from fountain).
- (e) Receipts from admissions (theatres and other places of amusement, athletic contests, dance halls, billiard halls, bowling alleys, etc.).
- (f) Receipts from other sources (specify sources).
- (g) Total net sales or operating receipts (total from "a" to "f").

Tables analyzing receipts as classified above will be presented in another report.

Proprietors.---The enumerators were instructed to include as proprietors all owners of unincorporated establishments and adult members of their families who were actively employed in, and devoting the major part of their time to, the business. Inactive proprietors or partners were not included. Inquiry concerning proprietors did not relate to incorporated establishments. Salaried officers of incorporated companies were considered full-time employees and not proprietors.

Average Number of Employees.---The average number of full-time employees for the year represents a total of the reported full-time employment (payroll nearest the 15th of each month), for the twelve months of 1933, divided by twelve. Average part-time employment is computed in the same manner. However, in drawing conclusions concerning part-time compensation, it should be remembered that part-time employment for the individual employee may vary from one hour to any part of a week which would not normally constitute full-time employment. Employees include salaried officers of corporations, other executives, salesmen, clerks, operatives, etc.

Full-time Employees.---Employees working a full day each day the establishment is open for business, even if this represents less than a full working week or month, are reported full-time employees. This principle is followed with reference to each payroll period for which information was obtained. Therefore, persons employed on a full-time basis for only part of the year are regarded as full-time employees for that part of the year. Employees working on a full-time basis in seasonal establishments are also treated as full-time employees.

Part-time Employees.—Persons employed only a few hours or days of the normal work-week or other payroll period are considered part-time employees. It is possible, however, that this definition was not followed uniformly by all reporting establishments as the average annual wage for part-time employees in some instances appears to be higher than would be justified on the basis of this definition.

Sex of Employees.—A distribution by sex of the combined number of full-time and part-time employees on December 30, 1933, or nearest representative day, was required of each establishment. The ratio resulting from this inquiry was used as a basis for computing the sex distribution of the average number of employees.

Payroll.—Total payroll represents the salaries, wages, commissions and bonuses paid part-time and full-time employees and salaried officers during the year. It does not include compensation of proprietors except the fixed salary of active partners if such salary is paid in addition to the partners' participation in profits. Such salaried partners, found predominantly in large businesses, are comparable to salaried executives of a corporation and are counted as employees rather than proprietors. Payroll figures are not shown in the tables when the total for a given classification is less than \$500.

Average Annual Earnings.—This average is obtained by dividing the full-time payroll by the average number of full-time employees. No average for part-time employees has been computed because the irregularity in the number of days or hours which various part-time employees work makes such an average of doubtful value.

Average annual earnings for classifications having less than ten full-time employees are not shown as the number of employees in such cases is too small to yield a representative average.

Total Operating Expenses.—Payroll, rent, interest, traveling expenses, advertising, taxes, insurance, light, heat, power and similar expenses are included in total operating expenses. Cost of merchandise, as distinct from that of materials and supplies, is not included.

#### DEFINITIONS OF CLASSIFICATIONS

Detailed definitions of kind of business classifications into which the different classes of establishments have been grouped are not presented in this volume but may be found in Volume I which contains summaries for the United States by kinds of business and by States, together with tables on employment by months; size of business based on volume of receipts; date of establishment of business; type of operation (chain and independent); and an analysis of receipts.
